

Mayan Supported Tokens, Nexus Identifier Format

Source: `https://price-api.mayan.finance/v3/tokens`, fetched 2026-07-13 (the verified snapshot behind `MAYAN-TOKENS.md` in `phase0-bridge-api/`; all rows verified on-chain 2026-07-13). EVM chains only (500 tokens across 12 chains), since nexus-v2 currently supports only the EVM universe. Non-EVM Mayan chains (Solana, Sui, Aptos, Fogo) are excluded; the full list lives in `phase0-bridge-api/MAYAN-TOKENS-NEXUS-IDS.md`.

Column notes:

- Token address: as returned by the Mayan API. `0x0000000000000000000000000000000000000000000000000000000000000000` is the native-asset sentinel (API-SPEC Section 2.1).
- Nexus universe: EVM for every row.
- Nexus chain ID: canonical eip155 id; the full identifier is `EVM_<id>` (API-SPEC Section 2). Note Linea, Unichain, and Sonic are EVM but not nexus-v2 chains today (not in the deployment config).
- Wormhole chain ID: `wChainId` from the Mayan API, constant per chain.
- Decimals: from the Mayan API, 100% verified on-chain 2026-07-13 (see `MAYAN-TOKENS.md` header for method).

Chain key

Chain	Nexus universe	Nexus chain ID	Wormhole chain ID	Tokens
ethereum	EVM	1	2	164
bsc	EVM	56	4	132
polygon	EVM	137	5	84
avalanche	EVM	43114	6	42
optimism	EVM	10	24	22
